SKILLS

- **Programming Languages:** PHP, JavaScript, TypeScript
- **Frameworks:** Laravel, Vue.js, Nuxt
- **Databases:** MySQL, MongoDB, Redis
- **APIs:** REST APIs, Swagger / OpenAPI
- **DevOps & Observability:** Prometheus, Grafana, Docker, Linux, Git

PROFESSIONAL EXPERIENCE

FRETATECH SOLUÇÕES

Mid-level Software Developer

Remote, Brazil

Nov 2024 – Present

- Maintenance and improvement of SaaS platforms using PHP, Laravel, JavaScript/TypeScript, Vue.js, Golang, MySQL, MongoDB and related technologies.
- Integration of external services for multiple features, including payments, fiscal systems and map services.

Key contributions:

- Led the development of a white-label platform using Nuxt (Vue.js) and TypeScript, modernizing the user experience and improving clients' SEO.
- Maintained a Golang service to cache requests to map services (Google Maps, HERE Maps), reducing operational costs by up to 90%.
- Implemented full infrastructure observability using Prometheus and Grafana, increasing visibility and accelerating issue resolution.

BRASIL DIGITAL TELECOM

Junior Software Developer

Porto Velho, RO, Brazil

Oct 2022 – Nov 2024

- Maintenance of the company's internal ERP system using PHP, Laravel, MySQL and Redis.
- Integration of external platforms for customer management, finance, connectivity and business operations.
- Delivered technical trainings for developers, interns and other departments.
- Operated and troubleshooted servers via SSH when needed.

Key contributions:

- Implemented caching with Redis, reducing query and load times by up to 90%.
- Designed and developed REST APIs, fully documented with Swagger / OpenAPI.
- Built several financial reports, improving data visualization for executive decision-making.
